## SUMMARY

Full Stack Developer with hands-on experience in building scalable web applications using React, Angular, Node.js, and Express.js. Skilled in creating reusable components, integrating RESTful APIs, and delivering responsive, user-friendly interfaces. Proven ability to work in Agile teams and contribute to real-time, data-driven platforms across SaaS and enterprise domains. Focused on delivering impactful solutions that improve performance, usability, and business efficiency.

## EXPERIENCE

**Software Engineer**                                                          Nov '22 — Present
Bar Code India                                                                              Pune

- Engineered dynamic, responsive web applications using **React,Angular**, **Node.js, express.js** following modular and scalable design principles.
- Built **reusable components** and integrated **RESTful APIs**, improving development speed and reducing redundant code across multiple projects.
- Collaborated closely with backend developers to align API contracts and streamline end-to-end functionality, reducing integration issues by over 30%.
- Played a key role in delivering high-performance, user-friendly applications that improved client satisfaction and reduced change requests.

**Web Developer**                                                                 Mar '22 — Aug '22
Narachi Consultant                                                                       Pune

- Developed a multi-tenant SaaS platform using **React**, **JavaScript**, and **TypeScript**, enabling customized interfaces for different client organizations.
- Built dynamic, form-driven modules with **HTML**, **CSS**, and **Bootstrap**, improving patient onboarding and clinic workflow automation.
- Implemented reusable components and client-specific configurations, streamlining onboarding and reducing development effort.
- Ensured cross-browser compatibility and responsive design, enhancing accessibility and user experience across devices.

## SKILLS

**Technical Skills:**    React, Angular, Node.js, JavaScript, TypeScript, Express.js, HTML, CSS, SQL, Rest API, Bootstrap
**Development Tools:**    Git, JIRA, Postman, Socket.io
**Soft Skills**    Great Communication, Analytical Thinking, Problem Solving

## PROJECTS

**Manufacturing Intelligence**, Bar Code India

- Designed and developed a responsive, modular UI using **Angular**, **TypeScript**, and **Bootstrap**, improving cross-device accessibility and simplifying future enhancements.
- Built dynamic dashboards and real-time visualizations with **Chart.js**, enabling production teams to make faster, data-driven decisions resulting in a **40% reduction in issue response time**.
- Created reusable components and reactive forms that allowed users to build custom forms and labels through the UI, **reducing backend support requests by over 60%**.
- Delivered intuitive **voice-assisted navigation** and full process traceability, helping reduce onboarding time and improving compliance with manufacturing standards.

**RFID Scanner Interface Portal**, Bar Code India

- Developed a full-stack RFID management portal using **Angular**, **Node.js**, and **Socket.io**, enabling real-time tag reading, device monitoring, and remote operational control.
- Implemented live socket-based communication for continuous RFID tag streaming and instant device status updates, improving operational visibility.
- Built reusable UI components and dynamic dashboards with **Angular Material**, streamlining the interface and allowing faster rollout of new features.
- Integrated role-based access and secure device configuration via UI-driven forms, **reducing manual configuration errors by 50%**.
- Enabled proactive device health monitoring and remote start/stop control, leading to a **45% reduction in unplanned downtime** across monitored locations.

**Ayurvedic Clinic Portal**, Narachi Consultant

- Developed a **React** based UI allowing users to **find clinic locations, view doctor availability**, and **book appointments** with ease.
- Enabled **user login and profile management using JWT authentication** with access to prescriptions, medicine details, and automated visit reminders.
- Designed a **calendar-based booking system** with responsive design, reducing appointment no-shows and manual coordination.

- Built a dedicated module for Medical Representatives (MRs) to manage travel logs, new client entries, and product updates, improving internal communication.

## EDUCATION

**Bachelor's degree in Computer Science**, Haribhai V. Desai College

Jun '18 — Apr '21
Pune, India
